Dr Feelgood
Prague Symphonia
Bucks Fizz
Francis Rossi
Nightwish
many others

Has used...

HELIOS
ORPHEUS
SIGMA

PIP WILLIAMS

Producer (and lecturer at Thames Valley University)

“I’m using the ORPHEUS, the HELIOS and the SIGMA, and they have all yielded extremely pleasant sonic results. The ORPHEUS has proved fantastic as a drum overhead and acoustic guitar mic. The HELIOS is a beautiful vocal mic, and has also been wonderful on flute and other woodwinds.

“As a big fan of ribbon mics, I’ve loved the transparency of the SIGMA when used on all saxes and violin. Very effective too on acoustic guitar. The whole ribbon mic thing is vastly overlooked in the industry!

“These are first-class mics full stop, and I have no hesitation in recommending them to anyone who wants an organic, musical sound!”

“They’ve all been impressive in their versatility. They are well suited to all applications, from hard rock right through to jazz, orchestral instruments and vocals. This means that a project studio as well as a professional facility can safely buy these microphones knowing they’ll cope adequately with pretty much all their needs.

“They are also very well built, with a lot of thought gone into providing secure, practical mounts. They are beautifully made, invoking a long-gone era of attention to aesthetics as well as functionality, and one can be confident that they will withstand the rigours of daily studio usage.

“One is tempted to use that old saying ‘great for the price’, but that simply isn’t accurate. These mics compare very favourably with established industry favourites costing far more. These are first-class mics full stop. I have no hesitation in recommending the Sontronics brand to anyone who uses microphones and wants an organic, musical sound!”

*Thames Valley University is just one of the establishments involved in the Sontronics Education Partnership Programme. Find out more details at www.sontronics.com
